Planwell's affordable ROOFING

Thank you for your recent enquiry about Planwell and our top quality Permaroof Sheeting.

This is our latest colour brochure on the Permaroof range of products as we celebrate Planwell's 37th Anniversary, to view the full brochure go to: planwell.co.uk

If you are intending a roofing project in the weeks/months ahead then either telephone or email our office for a quick quote (Monday-Friday) . We will then work out exactly what materials you need and the prices, etc.

From our new base at Buckie we manufacture PERMAROOF sheeting, cut, folded, packaged and delivered at the right time and at the right price. Each order requires to be measured and quoted individually and proper, professional advice can be given on this and the correct roofing to suit your needs.

I trust we will be able to accommodate you on this occasion.

Yours faithfully

Mark Duncan

PERMACLEAR ROOFLIGHTS

LET THE LIGHT IN WITH PERMACLEAR

Whether you have a building, garage or shed which is dark or dim then simply 'let the light in' with our **PERMACLEAR** range of translucent sheeting. Available in profiles to match our permarooft metal sheets - **PERMACLEAR** is easy to fit, relatively cheap to buy and will give you the benefit of natural light for years to come. Available in various lengths.

NOW AVAILABLE IN LONGER LENGTHS

Description

Translucent roof sheeting designed to let the light into buildings.

Sheet Thickness

8oz, this is a strong rooflight.

Life Expectancy

25 years plus.

Note

Permaclear is designed to let plenty of light (85%) into a building, the sheets are fibre reinforced so are not as clear as glass.

If it's an insulated roof, then a 17mm profile (underliner) rooflight can fitted to provide a "double skinned" area.

PERMACLEAR pricelist

FLASHINGS - in POLYESTER, NOVA and PLASTISOL

Planwell manufacture all Permaroof metal flashings (edging) to suit individual requirements. Here are examples of the three most popular flashings required.

Permaroof Flashings

- All flashings are manufactured in the Planwell factory to suit your individual requirements
- All flashings are 3m in length
- Flashings are made in materials and colours to match your roofing sheets
- The standard width of a flashing before folding is 400mm (16"), so for example the flashing size can be 200 x 200 or 250 x 150 etc.
- Wider flashings can be provided if required
- Flashings are available in 0.5mm NOVA, 0.5mm Polyester and 0.7mm Plastisol material
- All flashings are folded with "safe edges" as standard
- All materials are packed in Planwell's protective wrapping paper

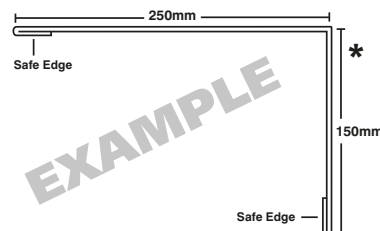

- We have provided just three examples of different types of flashings on this page, for further details please contact our office
- **If you are unsure about what you require then please provide either a sketch and/or a photograph of your roof**

ORDERING INSTRUCTIONS

Please indicate your requirements as per illustration shown right. Use asterisk (*) to denote colour side.

NB. All Flashings are produced in 3 metres lengths only.

NOTE - Flashings wider than standard can be made, please contact Planwell for further details and price.

PERMAROOF FLASHINGS

SPECIALLY MANUFACTURED TO SUIT YOUR INDIVIDUAL NEEDS

CUSTOMER PROFILE

PLANWELL ROOFING supply their 'permaroof' range of metal roof sheeting to thousands of customers every year throughout Scotland.

One very interesting project was recently in the small picturesque village of Portmahomack for Sandra and Stewart Smart who own luxury 'holiday home' type cottages which are rented out throughout the year by people from all over Britain.

DOLPHIN VIEW
PROPERTIES
HOLIDAY HOMES

Dolphin View Properties recently built four new luxury cottages with each one sleeping up to six people at a time.

Stewart Smart said: "We needed a roofing product which would be **attractive in appearance**, would be **maintenance free** and of course **cost effective**. We contacted Planwell of Buckie and soon discovered that their service was first class. After looking through their colour brochure, we then decided on what we were looking for. After ordering from Planwell, our order was made-up and dispatched very quickly.

The actual installation of Planwell's roof sheets was so simple and we were able to complete each cottage within a matter of hours. **We are delighted with the finished roofs** and needless to say we have been recommending

Planwell Roofing to a great number of our customers since then".

Another satisfied customer for Planwell. Anyone interested in renting accommodation in this beautiful part of the Scottish Highlands should contact Shirley Smart on 07479 364634. www.dolphinview.co.uk

Planwell BOX GUTTERS

Planwell manufacture box gutters to suit customers individual requirements, all gutter flashings are available in a maximum length of 3m long. The flashing joints can be either bolted or riveted together on site (please apply a quality mastic between the joints).

Stop ends and centre drops are supplied, joint pieces (optional) and the gutter flashings can be manufactured in a variety of different colours, thicknesses and finishes providing a top quality gutter system.

Planwell
roofing
Supplies

Contact Planwell today with your requirements and we can provide you with a quotation for this.

• The above 3 photographs show the different stages of a Planwell box gutter being installed on site along with insulated permaroof sheeting.

• When installed the gutter shown was also given a coat of Planwell's Roofcoat Xtra product to provide an all in one seamless finish.

Planwell FLAT SHEETS AND FLASHINGS

Over the last 37 years Planwell have provided flat metal sheets and flashings for a wide variety of different applications, including signs, trailers, caravan roofs, the boarding up of windows on schools, for lining walls and ceilings inside buildings, the list goes on and on.

All of the flat sheets and flashings are cut to suit your individual requirements (the maximum flashing lengths are 3m long).

All flat sheets and flashings are maintenance free and designed to last for a lifetime.

Available in a choice of different colours, thickness and finishes from our Permaroof range. Free colour samples are available.

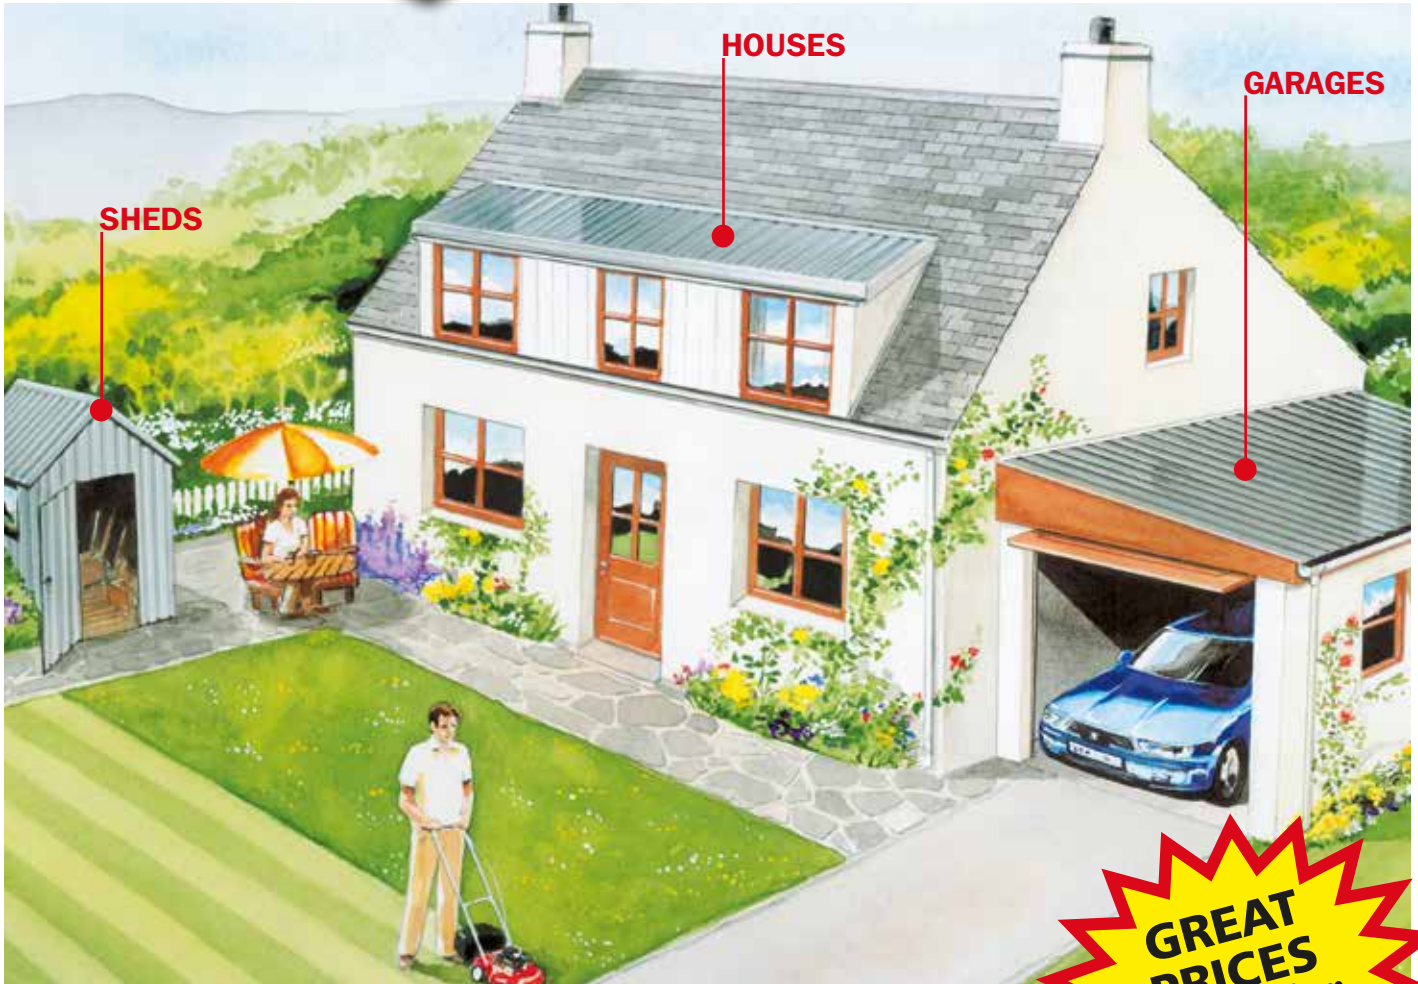

For a free quotation for your job please contact Planwell today on (01542) 832170

new roof from Planwell

There has never been a better time to think about a new or re-roofing project.

Planwell's **Permaroof** metal sheeting has proved its worth on thousands of projects throughout Scotland.

Maintenance free and with a long sheet life expectancy, **Permaroof** is ideal for nearly all roofing situations.

It lasts longer than old fashioned materials and is technologically superior to other roof sheet systems.

All roofing is manufactured to your individual requirements at the Planwell Factory and the finished roof will enhance the appearance of your property. **SO DON'T DELAY - ORDER TODAY**

PLANWELL PERMAROOF - MADE TO LAST!

Answers to the most common Questions we are asked

Q WHAT IS PERMAROOF?

A Permaroof is precoated profile metal roof sheeting, modern and attractive in appearance.

Q WHAT CAN PERMAROOF BE USED FOR?

A Permaroof is designed for and used on Houses, Garages, Sheds, Industrial and Farm Buildings, Sports Stadiums, D.I.Y., etc.

Q IS PERMAROOF EXPENSIVE?

A No - Permaroof is a very competitively priced, affordable product, probably the most cost effective that money can buy - phone Planwell today and you will be pleasantly surprised!

Q HOW DO I KNOW THAT I AM BUYING AT THE BEST PRICE?

A Planwell are Rollformers, this means that you are buying direct from the manufacturer - **best materials - best prices.**

Q WHAT IS THE LIFESPAN OF PERMAROOF?

A When installed correctly Permaroof is expected to remain **maintenance free** for between 20-30 years - a lifetime for most people - and has a long sheet life expectancy. The Nova Mica product comes with a 20 year product guarantee and again has a long life expectancy.

Q WHO INSTALLS IT?

A Installation of Permaroof is quite simple - and it is ideal for D.I.Y. enthusiasts, but if you need someone locally to install Permaroof for you, then we recommend you contact any reputable joiner or roofing contractor in your area.

Q WHICH PROFILE IS BEST?

A The Permaroof range of **30mm profile roof sheeting** provides the best value for money as it is the maximum 'metre wide cover' sheet - it is also the strongest from this range - and is rollformed at the Planwell Factory to suit your individual requirements. Colour samples are also available.

Q WHAT LENGTHS ARE AVAILABLE?

A Permaroof is available in **long single sheet** lengths of almost any size, please phone Planwell for more details.

PERMAROOF - strong enough to be walked on

"Planwell provides top quality materials delivered at the right time and the right price."

Mark Duncan

MANAGING DIRECTOR

Q SHOULD I CHOOSE THE POLYESTER, NOVA-MICA OR PLASTISOL COATED SHEETING?

A **Polyester** is the choice of most customers, it has a smooth painted finish both sides and is used on all roofing applications and comes with a 10 year product guarantee. **Nova-Mica** has a textured finish on the outside, smooth paint finish inside and comes with a 20 year product guarantee. **Plastisol** has a leathery grain outside finish, smooth paint finish inside and comes with a 10 year product guarantee.

Q WHAT'S THE BEST TYPE OF ROOF AVAILABLE?

A An insulated roof is always best as it avoids any possible condensation problems and has many advantages such as keeping heat in, saving fuel bills, reducing noise etc.

Q WHAT THICKNESS IS BEST?

A 0.5 thick is the most commonly used (for example if the 'purlin' spacings are at 4ft. (1.2m) centres). 0.7 thickness is used if the purlin spacings are wider apart or for heavier industrial use. The maximum purlin spacings for 0.7 thick sheeting is 5ft (1.5m) apart.

Q WHAT IS THE RECOMMENDED MINIMUM FALL/SLOPE?

A The recommended minimum fall/slope is 5°.

Q DO THE 'RIDGE' TYPE FLASHINGS FIT INTO THE SHAPE OF THE SHEET?

A No. The permaroof flashings are made to the size and angle that you require and are fixed on top of the roof sheets along with Planwell's 'All Weather Fillers' which are fitted so as to close off the spaces from wind and rain, birds, etc.

Q DO THE FIXINGS FIT IN THE FLAT OF THE SHEET?

A Yes, they are modern, **high performance self-drill fixings** which come with a special sealed washer - so they will not leak. They are fitted in the flat of the sheet so as to provide the best resistance to uplift from high winds.

Q WHAT TYPE OF FIXINGS DO I REQUIRE AND HOW MANY?

A This depends on the type of application. We will advise which type and will provide the proper fixings required as well as working out how many you require, etc. For further information phone the Planwell Technical Helpline today.

Q HOW DO I ORDER?

A Please contact us either by email (enquiries@planwell.co.uk) or telephone our office (Monday - Friday) with your details. We will then work out what materials you require, what the total cost will be and we can then arrange your order from there.

Q WHAT ARE THE PAYMENT TERMS?

A Planwell is a cash and carry business, providing you, the customer with the best materials at the best prices. Our normal terms are therefore payment in full before your order can be dispatched (see 'How to Order' section in this brochure).

Q HOW QUICKLY WILL MY MATERIALS BE DELIVERED?

A From the time that we receive payment in full - your order will be very quickly manufactured and dispatched (normally within a few days, please phone Planwell for exact details on delivery of your order).

We hope we have covered most of the questions that are normally asked. If however, you need more details/information on anything else then please do not hesitate to contact Planwell today.

ROOFING

With the credit crunch set to bite, it is predicted that more than 60 percent of homeowners in Scotland will now carry out major improvements to upgrade their properties this year.

Purchasing a new roof from Planwell Roofing Supplies will provide you with real, long term value for your money. Planwell - Best Quality Roofing at Affordable Prices.

Established 1989 - 37 years of Quality

PERMAROOF - SIMPLE INSTALLATION

FIGURE 1

FIGURE 2

FIGURE 3

VELUX WINDOWS

Velux windows are not normally fitted with metal roof sheeting.

Despite this there has been an increase in the last few years in the amount of velux windows being installed by our customers.

The following information is therefore a guide as to how best to seal around any possible installation of velux windows.

- Firstly the minimum fall for this type of window must be achieved, for velux windows this is currently a minimum fall/slope of 15°.
- **Figure 1** shows that a timber frame should be built at least 75mm above the height of the metal roof sheeting. The metal sheeting should then be cut to fit around this.
- **Figure 2** shows flashings fitted around all four sides of the velux. Flashings should be fitted which go up to the timber frame and cover over the complete width of a profile (so that the flashing finishes over the top of the upstand/profile of the metal sheet).
- The area behind the velux should then also be "closed off" by fitting a flat metal sheet flashing (on top of the metal sheet) behind the velux - all the way up to the underside of the top flashing - this will stop any water flowing down the flat sections of the metal sheeting. Any joints on the flat sheet should be given a good overlap (at least 400mm, and should also be sealed with a good quality silicon mastic).
- Foam fillers should be fitted at the bottom flashing (below the velux).
- **Figure 3** shows a flashing then being fitted on top of the timber frame and over the side flashings. These should also be sealed with a good quality silicon mastic.
- All flashings should be fixed by using Planwell's self-drilling screws and colour caps.
- **PLEASE NOTE** it may be that the flashings for around the velux have to be measured and ordered once the sheeting has been cut and installed around the timber frame.

This guide is to show one way of how to seal around velux windows - it does not show how velux windows should be installed. Please check with the manufacturer of the velux windows for full installation instructions.

PERMAROOF SELF-DRILLING FIXINGS

All of the permaroof fixings are self drilling (a fixing socket is provided with all orders) and are available in a variety of different types and lengths for both 'single skin' and insulated roofs and to fix to either timber or steel purlins.

Colour caps to match your choice of roof sheets and flashings are also supplied along with the fixings provided.

The Planwell Rollform factory

PLANWELL - 37 YEARS of guaranteed quality and top service for roofing

A GOOD quality roof can be the crucial difference between a make-do solution and a solid structure which is built to last.

For 37 years, Planwell Roofing Supplies have been helping tradesmen, contractors, farmers and DIY enthusiasts throughout Scotland with all their roofing needs.

Based in Buckie, in the north-east of Scotland, the firm manufacture and supply Permaroof box profile metal roof sheeting.

Being cost effective, simple to fit and highly durable, Permaroof is ideal for garages, houses, sheds, industrial and farm buildings, sports stadia and flat roofs.

Every order is cut, folded, packaged and delivered to each customer's exact specifications and requirements.

As well as being maintenance-free for a long time, Permaroof sheeting also comes with a product guarantee for up to 20 years - a testament to Planwell's excellent customer care.

Managing Director Mark Duncan said: "We pride ourselves on looking at what the customer needs.

"We also provide them with fitting guides, sockets and gloves, which they use to fit the roof with.

We want to provide our customers with a good quality product that will stand the test of time.

"We also have special monthly offers available in a choice of colours."

Permaroof sheeting is available in a wide range of colours and finishes.

Established 1989 - 37 years of Quality

Popular models include 0.7 Plastisol - for heavier industrial use - and 0.5 Polyester, both of which come with a 10 year guarantee and 0.5 & 0.7 Nova "Mica" which is guaranteed for 20 years.

The company also supply an insulated roof sheet system that helps keep the heat in and eliminate condensation.

Planwell's Permaroof - ideal for houses and conservatories

If you are thinking about updating your roofing or need professional advice, you can call Planwell free on 0800 02 88 272 or visit www.planwell.co.uk

PLANWELL'S PRODUCT GUARANTEE

PLANWELL'S PRODUCT GUARANTEE: a 20 year product guarantee is available with our NOVA-MICA range of sheeting and a 10 year product guarantee is available with both our Polyester and Plastisol ranges.

THOUSANDS OF SATISFIED CUSTOMERS ALL OVER THE COUNTRY

"Hi Sally, Mark and the Team, We seem to live in a world of constant reviews and it's nice to be able to offer an unsolicited comment for a change. The service I have received from Planwell throughout the past couple of months has been exemplary. Immediate and easily understandable initial and subsequent revised quote based on additions made. Straightforward settlement. Cut to size delivery on the same day to two separate addresses within 10 days of the original quote. Easy going co-operation with the delivery driver to offload the roofing materials exactly where they could be easily accessed and handled. Complete accuracy with cutting and folding requirements. An unexpected, but welcome after sales experience following a small request enabling me to utilise several offcuts. Thank you."

C. Cooper, Dingwall

"All well received today, really good service and my thanks to the delivery driver. Kind regards."

A. Varney, Forfar

"I would like to thank your company for the quick and efficient way my order was handled."

R. Murdoch

"I had a delivery of some roofing today which arrived on time by a very efficient driver, everything went clockwork. Thanks for a good service."

G. Powlesland, Kinlochleven

"My workshop roof is now finished & I am very pleased with how it has transformed my woodwork retreat! I have to say that I was very impressed with your service, and the lorry driver was very helpful. The packaging was A1 & everything needed for the job was in place. Absolutely first class, I would recommend your company to anyone who needed your services."

J. Armitage, Ayrshire

"I haven't yet started installation, but the delivery, packaging and accessories have been excellent. I particularly appreciated the work gloves. Your driver was great - just sorry that we didn't offer him a cup of tea, which we didn't think about until he had left. Please say sorry!"

Andrew

"I recently put Planwell roofing on my garage roof, and it's rained nearly everyday since and my garage is as dry as a bone. Your price for the roofing was extremely competitive and was easy to put on. The icing on the cake was I was supporting a Scottish based company. Well done and good luck for the future."

G. Dick, Inverness

"Just a quick email to thank you for a great product and everything about my dealing with Planwell was a good experience. My outdoor kitchen is looking good and I now intend to do all of my sheds with your products now that I have seen first hand how professional you guys are. I have also recommended Planwell to my friends and colleagues, many of whom are farm and small holding owners with stables etc. Also special thanks to your driver who was a great help in delivering, he did a great job. Thank you again."

G.R. Valentine, West Lothian

"I just wanted to write to say how impressed I have been by your customer service. My initial enquiry and order were very easy. I then received a comprehensive sales pack in the post the following day and a phone call confirming the order date. Today the roofing arrived exactly when I was told it would and the driver rang me 30 minutes before to confirm the time. I don't think this much customer service could have been improved on, credit where credit is due! Thanks very much."

HOW TO ORDER YOUR ROOF SHEETING

Either telephone or email Planwell and an exact price will be worked out for you then provided to you in writing.

Please then check that all of the details on your quotation are correct. If they are, then sign one of the copies and return your acceptance to Planwell either by email or post.

If there are any details in the quotation that need to be changed then please contact the Planwell office to discuss this.

Planwell Permaroof Sheetting
- designed for roofs and wall cladding

HOW TO PAY

Planwell is a cash and carry business, providing you, the customer, with the best materials at the best prices.

Our normal terms are therefore payment in full before your order can be dispatched. Payment can be made by card or bank transfer, we no longer accept cheque or cash payments due to local bank closure.

Your order will normally be manufactured and dispatched a few days later. Please phone Planwell for further details on your order.

For Free quotations/professional advice, telephone or email our helpline Monday-Friday 9am-5pm.
